

iDigitalMedium Experiment Streams

ALL STREAMS ARE 100% LIVE 24/7

Unless otherwise specified – audio recordings of real human voice are NEVER included in the source experiment audio. Stream description and setup may change at any time and become outdated.

For any questions or to report a stream that is not functioning, please email keith@idigitalmedium.com

All experiments created by Keith J. Clark and *iDigitalMedium* unless otherwise specified.

YouTube VIDEO\AUDIO Stream "<https://youtu.be/DecKzljrO8c>"

12/6/19 Images are a live spectrograph using software Sonic Visualiser in a synthesized environment - meaning - it is just white noise inside a computer. There should be no faces - only random static.

12/6/19 Audio is currently from the Marconi Coherer mentioned in stream 1 below.

AUDIO ONLY STREAMS

***For Audio Only Streams below, you have the option of clicking on any one of the 4 media player links OR selecting the web page streamer. If you select the *WebPage Streamer instead of the software player options, you will need to click on and allow Adobe Flash Player in your browser"

Step 1:

Step 2:

Stream 1 "Marconi Coherer"

This "coherer" is a custom hardware device created by German colleagues from <https://raudive.de>
Created in honor of a primitive form of radio developed by Guglielmo Marconi - the inventor of radio.

Stream 3 "Michael"

One of the first LIVE synthetic streams dating back to 2017.

3 sine waves randomized with EVPMaker, plus white noise (to add breath), then filtered.
